

## Unified Security for Organisations in Aotearoa

We partner with Fortinet to deliver enterprise-grade security solutions. Together, we understand that your reputation and regulatory standing depend on having security that defends relentlessly.

### THE CRITICAL CHALLENGES FACING ORGANISATIONS RIGHT NOW

New Zealand businesses face a perfect storm:

- ❗ Cyber criminals are targeting financial data and financial assets
- ❗ Regulators like the RBNZ and the Privacy Act are raising the bar on compliance
- ❗ Customers expect seamless, secure digital experiences they can trust - 24/7

Relying on legacy systems or multiple disconnected tools creates vulnerability. These gaps are exactly where attackers target and strike.

#### Legacy systems create weak spots

Old infrastructure and disconnected tools leave gaps in protection. When systems don't work together, cybercriminals can creep in and access sensitive financial data.

#### Growing cyber threats targeting financial data

Businesses managing sensitive financial data are top targets for fast-moving attacks. One breach can cost millions, trigger penalties, and damage customer trust beyond repair.

#### Compliance is complex without integration

Meeting RBNZ, Privacy Act, and global standards is challenging when tools don't connect. Manual reporting and scattered audit trails add workload and raise the risk of non-compliance.

## THE ADVANTAGE OF FULLY INTEGRATED SECURITY

Cyclone brings local expertise and proven delivery. Fortinet provides world-leading, Gartner-recognised security technology. Together, we deliver unified, AI-driven protection that grows with your organisation.

### ✔ Build customer trust with superior data protection

Fortinet's Security Fabric secures every part of your infrastructure, from firewalls and networks to advanced AI-powered threat detection. Everything works together to stop breaches before they happen, giving you stronger protection with less complexity.

### ✔ Simplify operations with one integrated platform

Unified management reduces IT complexity, freeing your team to focus on other strategic initiatives rather than managing disparate security tools.

### ✔ Accelerate digital transformation without compromise

Whether expanding digital capabilities or implementing new fintech partnerships, your security infrastructure scales seamlessly with your business ambitions.

### ✔ Meet compliance

Easy reporting, automated threat response, and clear audit logs help you meet RBNZ requirements and international standards with confidence.

### ✔ Scalable growth

Security that grows with your organisation, supporting new digital services and market expansion without compromising protection.

### ✔ Proven ROI

Strengthen security whilst simultaneously delivering measurable value to your business.

## YOUR SECURITY PARTNER FOR THE DIGITAL FUTURE

Don't let security concerns limit your digital ambitions. With Cyclone and Fortinet, you'll access more than technology - you'll get a dedicated local team focused on your success.

Drop us a line today to discover how unified security will transform your business.
